- 1/4” connector output format.
- Lifetime Guarantee.

Features and Set-up

# Set-up Guide

## Introduction:

**Hart Dynamics Electracoustic® Percussion Products** are the result of over 15 years of research and development and represent the most comprehensive electronic percussion instruments available. Easy enough to use for the beginning drummer with features that allow the most advanced user flexibility never before achieved. To assure proper set up, take full advantage of your instruments functions, and to enjoy long and trouble free use, please read this Set-up Guide carefully. For additional assistance you may reference our website or call our technical support line (see below).

## How to use this Guide:

This Set-up Guide is designed to help you configure your instrument to the “power on” stage. Please refer to your Drum Module Owners Manual for playing and programming. After basic operation is achieved, you will probably want to “fine tune” settings to your personal style and taste.

## Conventions:

**TRS** stands for Tip / Ring / Sleeve. This is the same as a “stereo” jack, where one input, output or cable can carry two signals at the same time. You must use a TRS cable for dual trigger instruments and choke functionality.

STEREO/TRS 1/4” PLUG

MONO 1/4” PLUG

## INSTALLATION INSTRUCTIONS

### HAMMER KICK

1. Place **HAMMER KICK** on floor, ATTACH BASS DRUM PEDAL, and position to desired location.
2. Install cable into jack on side of pedal and other end into module input.
3. Adjust sound module sensitivity.

**NOTE: HAMMER KICK must be use with bass drum pedals that have a “floor plate”. Additional beaters may be used for double pedals. Only the main pedal requires floor plate.**

We value your patronage and are very much interested in any comments you might have. You may write or e-mail us so that we may use your input to continue to provide the best products and services available.

Enjoy!

Peter Hart
